	M8 INOX A2			
15492	Rubber strip 1200mm x 50mm x 1mm		(4x) 170	mm
15673	Rubber strip 1200mm x 40mm x 1mm		(4x) 2x 50	mm
16308	Rubber mat 400x500		1	pcs

- 3. Preparation
  - a. Rubber strips
    - i. TDLAR012002.01 with 15673 (4x)

ii. TDLAR012001.01 with 15492 (4x)

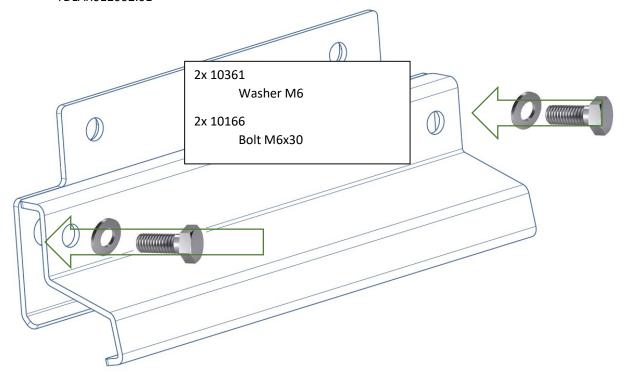

b. Roof rail support (4x)

#### Use the following items:

- TDLAR012001.01
- TDLAR012002.01

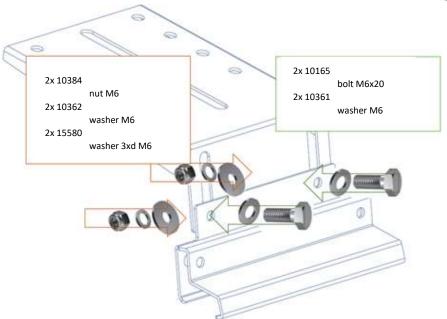

Attention: Do not tighten the bolts

#### a. Mounting support (4x)

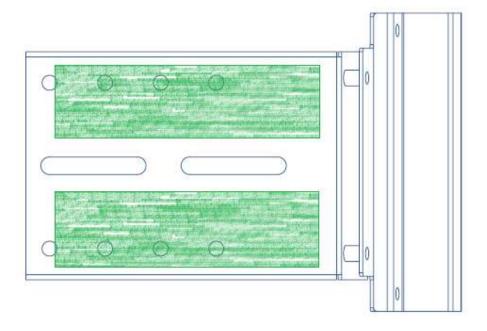

Cut off 8 strips of 150mm x 50mm from Article Code 16308

450mm				
			шш	
			500mm	

Place the rubber strips on the following location on top of the mounting brackets.

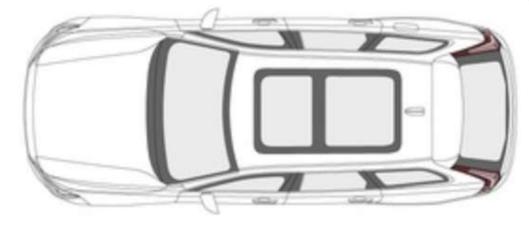

#### 4. Placement on the vehicle

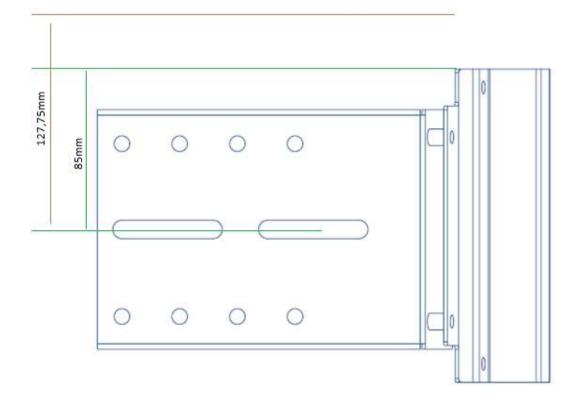

Determin the location on top of the vehicle.

Distance between center mounting bracket and back of the signalling panel is 127,75mm

Distance between center mounting bracket and end of roof rail is 85mm

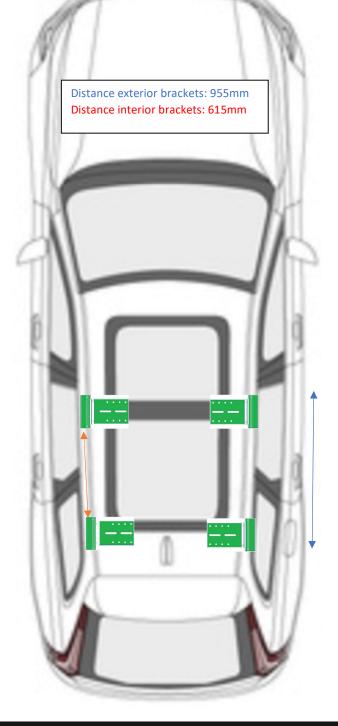

Distance between end roof rail and back signalling panel is 42,75mm

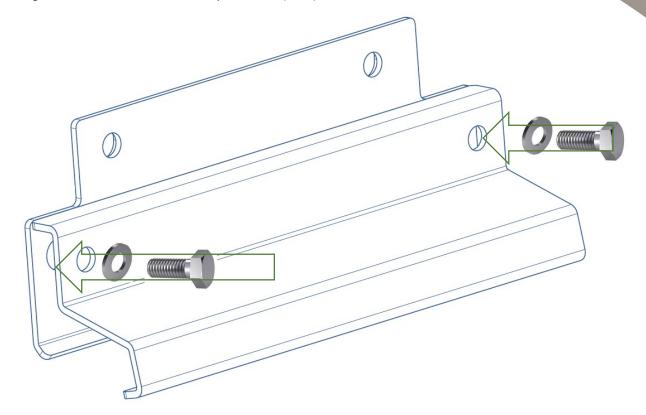

Both supports are heading towards the middle of the roof.

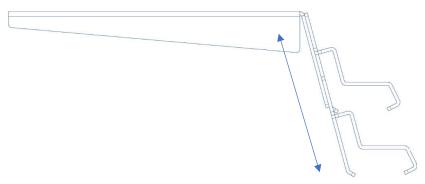

Tighten the bolts below with a torque wrench (8Nm)

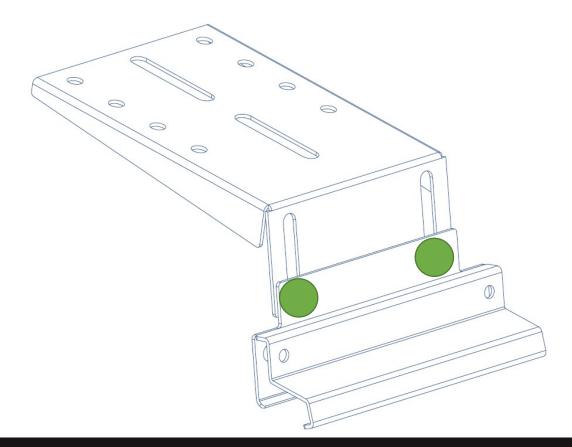

Adjust the height by moving the roof rail support like below.

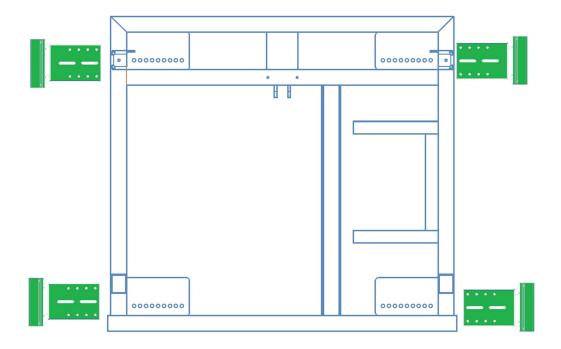

Tighten the bolt with a torque of at least 9,2Nm and max 9,9Nm

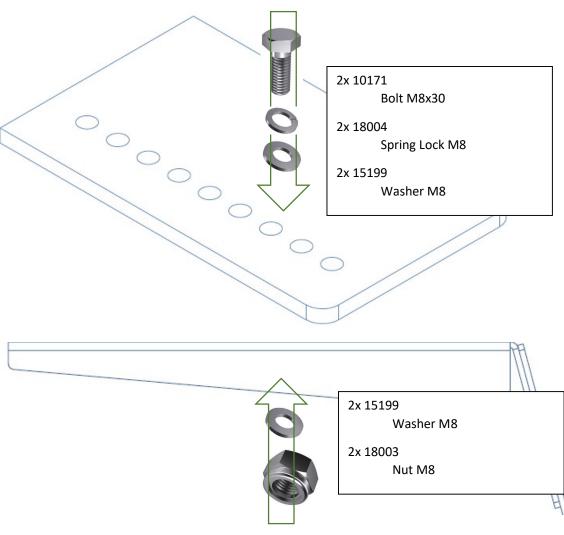

Place the dignalling panel on the 4 mounting kits.

Mount the signalling panel using the following mechanical fasteners like the picture below:

Tighten the bolt with a torque of at least 22,3Nm and max 24Nm
